
SOP: Weekly SEO Review, Keyword Research, GA4 Analysis & SEO Implementation

For Client Websites + RAAS Websites

Tools: Ubersuggest, Google Analytics 4, Client Dashboard, SEO Master Tracker | **Version:** 1.0

Ubersuggest will be used for rank tracking, keyword research, technical site audits, SEO opportunities, and competitor visibility.

GA4 will be used to track web traffic, acquisition, organic search behavior, landing-page performance, engagement, and key events/conversions.

1. Purpose

The purpose of this SOP is to create a repeatable weekly SEO workflow across all active websites.

This process ensures the team continuously:

1. Reviews SEO performance.
2. Reviews GA4 traffic and engagement.
3. Expands the list of keywords being tracked.
4. Identifies ranking, content, and technical opportunities.
5. Implements SEO improvements across every site weekly.
6. Keeps the client dashboard updated.
7. Assigns execution clearly to the correct dev team member.
8. Builds long-term organic traffic, leads, sales, and visibility.

The core rule:

Every site gets reviewed weekly. Every site gets an SEO action or a documented reason for no action.

2. Website Portfolio

2.1 Client Websites

Assigned Dev	Brand / Website	URL
Client Dev 1	Snarky A\$\$ Apparel	snarkyazzhumans.com
Client Dev 1	Blingy Bag LLC	blingybag.com
Client Dev 1	Snarky Pets	snarkypets.com
Client Dev 2	Serenity Scrolls	serenityscrolls.faith
Client Dev 2	Hwabelle	hwabelle.shop
Client Dev 2	PlayIQ	weplayiq.com
Client Dev 3	OxiSure Tech	oxisuretechsolutions.com
Client Dev 3	Montgomery Place LLC	montgomeryplacellc.com
Client Dev 3	OxiSure Tech — Oxygen Tubing Lifecycle Manager	oxisuretech-retention-app.web.app

2.2 RAAS Websites

Assigned Dev	Brand / Website	URL
RAAS Dev 1	CheerCPT	cheercpt.com
RAAS Dev 1	The Billionaire Brother	mybillionairebrother.com
RAAS Dev 2	Father Figure Formula	fatherfigureformula.com

3. Team Assignments

3.1 Client Dev Team

There are **3 developers** assigned to client projects.

Developer	Assigned Sites	Primary SEO Focus
Client Dev 1	Snarky A\$\$ Apparel, Blingy Bag LLC, Snarky Pets	Ecommerce SEO, product pages, collection/category pages, apparel/gift/pet keywords, image alt text, internal linking
Client Dev 2	Serenity Scrolls, Hwabelle, PlayIQ	Content SEO, product storytelling, faith/keepsake/education keywords, FAQs, landing-page improvements
Client Dev 3	OxiSure Tech, Montgomery Place LLC, OxiSure Lifecycle Manager	Health/wellness SEO, compliance-sensitive pages, technical SEO, trust-building content, app/product SEO

3.2 RAAS Dev Team

There are **2 developers** assigned to RAAS projects.

Developer	Assigned Sites	Primary SEO Focus
RAAS Dev 1	CheerCPT, The Billionaire Brother	AI/software SEO, product-led SEO, business strategy SEO, landing pages, technical implementation
RAAS Dev 2	Father Figure Formula	Coaching SEO, lead-generation pages, fatherhood content, funnel support, blog/content implementation

3.3 Backup Assignment Rule

Primary Owner	Backup Owner
Client Dev 1	Client Dev 2
Client Dev 2	Client Dev 3
Client Dev 3	Client Dev 1
RAAS Dev 1	RAAS Dev 2
RAAS Dev 2	RAAS Dev 1

If the primary owner is unavailable, the backup owner handles urgent fixes and weekly SEO implementation.

4. Core SEO Operating Principles

Every SEO action must support at least one of the following:

1. Increase qualified organic traffic.
2. Improve rankings for commercially valuable keywords.
3. Increase leads, sales, inquiries, sign-ups, or key events.
4. Improve engagement from organic visitors.
5. Improve site health, indexability, and crawlability.
6. Strengthen topical authority.
7. Improve client reporting clarity.

5. Tools and Source of Truth

5.1 Ubersuggest

Used for:

1. Rank tracking.
2. Keyword research.
3. Keyword ideas.
4. Competitor keyword analysis.
5. SEO opportunities.

6. Site audits.
7. Technical SEO issue discovery.
8. Tracked keyword expansion.
9. Keyword movement monitoring.

5.2 Google Analytics 4

Used for:

1. Organic traffic review.
2. Traffic acquisition review.
3. User acquisition review.
4. Landing-page performance.
5. Engagement rate.
6. Average engagement time.
7. Key events.
8. Conversions.
9. Ecommerce or revenue data, where applicable.
10. Lead-generation performance, where applicable.

5.3 Client Dashboard

Used for:

1. Client-facing performance visibility.
2. Ubersuggest SEO analytics.
3. GA4 traffic and behavior summaries.
4. Weekly SEO work notes.
5. Keyword movement summaries.
6. Completed work.
7. Next-step visibility.

5.4 SEO Master Tracker

Used internally to track:

1. Website.
 2. Assigned dev.
 3. Ubersuggest metrics.
 4. GA4 metrics.
 5. Keyword candidates.
 6. Approved keywords.
 7. Keyword-to-page mapping.
 8. Implementation status.
 9. Technical issues.
 10. QA status.
 11. Dashboard update status.
 12. Next action.
-

6. Weekly SEO Cadence

Day	Activity	Owner
Monday	Ubersuggest SEO review + GA4 traffic review	SEO Lead / SEO Specialist
Tuesday	Keyword research + keyword expansion	SEO Specialist
Wednesday	On-page SEO implementation	Assigned Dev
Thursday	Technical SEO fixes + content briefs	Assigned Dev + SEO Specialist
Friday	QA + client dashboard updates + weekly notes	QA Reviewer / Account Manager / SEO Lead

Every website must have a weekly entry in the SEO Master Tracker.

7. Weekly Review Workflow

Step 1: Open Ubersuggest Project

For each site:

1. Open the correct Ubersuggest project.
2. Confirm the correct domain.
3. Confirm location settings.
4. Confirm device settings if applicable.
5. Review rank tracking.
6. Review keyword movement.
7. Review site audit.
8. Review SEO opportunities.
9. Review competitor visibility.
10. Record findings in the SEO Master Tracker.

Step 2: Open GA4 Property

For each site:

1. Open the correct GA4 property.
2. Go to **Reports**.
3. Review **Acquisition**.
4. Review **Traffic Acquisition**.
5. Filter or review **Organic Search**.
6. Review **Landing Pages**.
7. Review engagement metrics.
8. Review key events or conversions.
9. Record findings in the SEO Master Tracker.

Step 3: Compare Ubersuggest + GA4

Use both tools together.

Ubersuggest Shows	GA4 Shows	Meaning
Rankings improving	Organic traffic improving	SEO is likely gaining traction
Rankings improving	Traffic flat	Keyword may have low traffic, weak CTR, or SERP issue
Rankings flat	Traffic improving	Traffic may be coming from other sources or long-tail search
Rankings dropping	Traffic dropping	Investigate technical, content, or competitive issue
Traffic improving	Engagement weak	Page may not satisfy user intent

Ubersuggest Shows	GA4 Shows	Meaning
Traffic strong	Conversions weak	CTA, offer, trust, or funnel problem

8. Required Weekly Metrics

8.1 Ubersuggest Metrics

Track weekly:

Metric	Requirement
SEO score / site health	Record current score
Tracked keyword count	Record total tracked keywords
Keyword gains	Record keywords that improved
Keyword losses	Record keywords that dropped
Keywords in positions 1–3	Protect and monitor
Keywords in positions 4–10	High-priority optimization
Keywords in positions 11–20	High-priority opportunity
Keywords in positions 21–50	Medium-priority improvement
Site audit errors	Record and assign
Site audit warnings	Record and prioritize
Competitor keyword gaps	Add to keyword candidate list

8.2 GA4 Metrics

Track weekly:

Metric	Requirement
Organic users	Track organic reach
Organic sessions	Track visit volume
New users from Organic Search	Track new audience growth
Engaged sessions	Track traffic quality
Engagement rate	Track relevance
Average engagement time	Track content usefulness
Landing-page sessions	Identify SEO entry pages
Key events	Track important actions
Conversions	Track business impact
Ecommerce revenue, if applicable	Track SEO revenue
Form submissions, if applicable	Track lead impact

9. Weekly Site Review Checklist

For every site:

- Open Ubersuggest project
- Confirm domain is correct
- Review rank tracking
- Review keyword gains
- Review keyword losses
- Review keywords in positions 4–20
- Review site audit errors
- Review site audit warnings
- Review SEO opportunities
- Open GA4 property
- Review Organic Search traffic
- Review landing-page performance
- Review engagement metrics
- Review key events/conversions
- Identify 3 SEO opportunities
- Research new keyword candidates
- Approve keywords for tracking
- Map approved keywords to pages
- Assign implementation to dev
- Complete at least one SEO action
- QA completed work
- Update SEO Master Tracker
- Update client dashboard or internal RAAS tracker
- Assign next action

10. Keyword Research SOP

10.1 Weekly Keyword Expansion Targets

Website Type	Keyword Candidates Per Site	Approved Keywords Added to Tracking
Client websites	5–15 weekly	3–10 weekly
RAAS websites	10–25 weekly	5–15 weekly

10.2 Keyword Research Sources

Use Ubersuggest to find:

1. Keyword ideas.
2. Related keywords.
3. Question keywords.
4. Comparison keywords.
5. Preposition keywords.
6. Competitor keywords.
7. Top-ranking competitor pages.
8. Existing ranking keywords not yet tracked.
9. SEO opportunities.
10. Long-tail terms.
11. Product/service-specific keyword variations.
12. GA4 landing-page insights.

10.3 Keyword Qualification Score

Each keyword must be scored before being added to tracking.

Factor	Score
Search intent fit	1–5
Revenue or lead potential	1–5
Ranking feasibility	1–5
Search volume	1–5
Page fit	1–5
Competition difficulty	1–5, subtract this

Formula:

Keyword Priority Score =
Search Intent Fit
+ Revenue / Lead Potential
+ Ranking Feasibility
+ Search Volume
+ Page Fit
• Competition Difficulty

10.4 Keyword Approval Rules

A keyword may be approved only if:

1. It matches the site's offer.
2. It has clear search intent.
3. It maps to an existing or planned page.
4. It has realistic ranking potential.
5. It supports traffic, leads, sales, visibility, or authority.
6. It is not only a vanity keyword.

11. Keyword Mapping SOP

Every approved keyword must be mapped before implementation.

Field	Requirement
Website	Site name
Assigned Dev	Dev owner
Primary Keyword	One main keyword per target page
Secondary Keywords	3–10 supporting keywords
Search Intent	Transactional, commercial, informational, navigational, local
Funnel Stage	Awareness, consideration, purchase, retention
Target URL	Existing or planned URL
Page Type	Homepage, product, collection, service, blog, landing page, FAQ
Current Ranking	From Ubersuggest

Field	Requirement
Current Organic Traffic	From GA4
Status	Researching, approved, implemented, tracking, needs revision
Next Review Date	Follow-up date

Cannibalization Rule

Do not assign the same primary keyword to multiple pages unless the SEO Lead approves a hub-and-spoke structure.

12. Site-Specific Keyword Buckets

12.1 Client Dev 1 Sites

Snarky A\$\$ Apparel

URL: snarkyazzhumans.com

Seed keyword buckets:

1. Sarcastic t-shirts.
2. Funny graphic tees.
3. Snarky shirts.
4. Gag gifts.
5. Funny blankets.
6. Sarcastic gifts.
7. Funny coworker gifts.
8. Adult humor shirts.
9. Funny apparel.
10. Offensive funny shirts.
11. Snarky gifts for women.
12. Funny gifts for friends.

Blingy Bag LLC

URL: blingybag.com

Seed keyword buckets:

1. Stylish women dresses.
2. Women accessories.
3. Boutique dresses.
4. Dressy handbags.
5. Fashion accessories for women.
6. Evening bags.
7. Women's fashion boutique.
8. Cute dresses online.
9. Statement accessories.
10. Trendy women outfits.
11. Women's boutique accessories.
12. Dress and bag sets.

Snarky Pets

URL: snarkypets.com

Seed keyword buckets:

1. Funny pet gifts.
2. Dog lover gifts.

3. Cat lover gifts.
4. Funny dog shirts.
5. Funny pet accessories.
6. Sarcastic pet products.
7. Pet parent gifts.
8. Funny dog mom gifts.
9. Funny cat dad gifts.
10. Pet humor gifts.
11. Funny pet owner gifts.
12. Snarky dog gifts.

12.2 Client Dev 2 Sites

Serenity Scrolls

URL: serenityscrolls.faith

Seed keyword buckets:

1. Bible verse scrolls.
2. Christian wall decor.
3. Scripture gifts.
4. Encouraging Bible verses.
5. Peace Bible verses.
6. Christian gifts for women.
7. Inspirational scripture decor.
8. Faith-based home decor.
9. Bible verse gifts.
10. Encouragement gifts.
11. Christian encouragement gifts.
12. Religious wall art.

Hwabelle

URL: hwabelle.shop

Seed keyword buckets:

1. Flower press kit.
2. Wedding bouquet preservation.
3. Pressed flower kit.
4. Preserve wedding flowers.
5. DIY flower pressing.
6. Memorial flower preservation.
7. Bridal bouquet keepsake.
8. Flower preservation kit.
9. Pressed flower art kit.
10. Meaningful flower keepsakes.
11. Wedding flower keepsake.
12. DIY pressed flower kit.

PlayIQ

URL: weplayiq.com

Seed keyword buckets:

1. Creative learning tools.
2. Play-based learning.
3. Educational play platform.
4. Kids creativity tools.
5. Interactive learning tools.

6. Build and grow learning.
7. Learning through play.
8. Imagination development.
9. Creative development platform.
10. STEM learning through play.
11. Educational games for kids.
12. Child creativity activities.

12.3 Client Dev 3 Sites

OxiSure Tech

URL: oxisuretechsolutions.com

Seed keyword buckets:

1. Oxygen tubing management.
2. Oxygen tubing replacement.
3. Oxygen tubing lifecycle.
4. Oxygen therapy accessories.
5. Oxygen tube safety.
6. Oxygen equipment organization.
7. Oxygen tubing tracker.
8. Home oxygen tubing.
9. Oxygen cannula tubing.
10. Medical tubing management.
11. Oxygen tubing care.
12. Oxygen tubing reminder.

Montgomery Place LLC

URL: montgomeryplacellc.com

Seed keyword buckets:

1. Healthier living at home.
2. Senior wellness products.
3. Health products for home.
4. On-the-go health accessories.
5. Independent living products.
6. Wellness products for daily life.
7. At-home health support.
8. Aging in place products.
9. Home comfort health solutions.
10. Daily living health products.
11. Senior lifestyle products.
12. Healthier living solutions.

OxiSure Tech — Oxygen Tubing Lifecycle Manager

URL: oxisuretech-retention-app.web.app

Seed keyword buckets:

1. Oxygen tubing lifecycle manager.
2. Oxygen tubing tracking.
3. Oxygen tubing maintenance.
4. Oxygen therapy tubing schedule.
5. Oxygen tubing replacement reminder.
6. Oxygen tubing safety management.
7. Oxygen tubing organization.
8. Home oxygen tubing tracker.

9. Oxygen tubing care.
10. Oxygen supply management.
11. Oxygen tubing app.
12. Oxygen tubing reminder app.

Compliance Note for OxiSure and Montgomery Place

1. Do not publish unapproved medical claims.
2. Do not imply diagnosis, treatment, cure, or prevention unless legally approved.
3. Use careful language around support, organization, tracking, reminders, education, and convenience.
4. Escalate questionable claims to the SEO Lead before publishing.
5. Prioritize trust, clarity, and compliance over aggressive copy.

12.4 RAAS Dev 1 Sites

CheerCPT

URL: cheercpt.com

Seed keyword buckets:

1. AI cheer judging.
2. Cheerleading judging software.
3. Cheer competition scoring.
4. Cheer score sheets.
5. Cheerleading competition judging.
6. AI sports judging.
7. Cheer routine scoring.
8. Cheer judging app.
9. Cheer competition software.
10. Automated cheer scoring.
11. Cheer scoring system.
12. Cheerleading judge app.

Primary SEO focus:

1. Product-led SEO.
2. AI and software keywords.
3. Cheer competition use cases.
4. Landing pages.
5. Demo/sign-up funnel pages.

The Billionaire Brother

URL: mybillionairebrother.com

Seed keyword buckets:

1. Business strategist.
2. Entrepreneur coaching.
3. Business growth advisor.
4. Startup strategy coach.
5. Business mentor.
6. High-performance business coaching.
7. Revenue strategy consultant.
8. Personal business advisor.
9. Founder coaching.
10. Business execution coach.
11. Business accountability coach.
12. Growth strategy consultant.

Primary SEO focus:

1. Authority positioning.
2. Service/offer pages.
3. Founder and entrepreneur intent.
4. Business coaching content.
5. Lead-generation CTAs.

12.5 RAAS Dev 2 Site

Father Figure Formula

URL: fatherfigureformula.com

Seed keyword buckets:

1. Fatherhood coaching.
2. Coaching for busy dads.
3. Dad life balance.
4. Work-life balance for fathers.
5. Fatherhood program.
6. Better dad coaching.
7. Personal development for dads.
8. Busy dad productivity.
9. Dad mindset coaching.
10. Fatherhood mentor.
11. Coaching for fathers.
12. How to be a better dad.

Primary SEO focus:

1. Coaching/service pages.
 2. Lead-generation content.
 3. Fatherhood pain-point keywords.
 4. Blog/content implementation.
 5. Funnel CTAs.
-

13. On-Page SEO Implementation SOP

Step 1: Review the Target Page

The assigned dev and SEO specialist review:

1. Page title.
2. Meta description.
3. H1.
4. H2/H3 structure.
5. Body copy.
6. Product/category/service description.
7. Image filenames.
8. Image alt text.
9. Internal links.
10. CTA placement.
11. FAQ section.
12. Schema, if applicable.
13. URL slug.
14. Mobile layout.
15. Page speed concerns.
16. Indexability.

Step 2: Implement SEO Updates

Element	Standard
Title Tag	Include primary keyword naturally, preferably near the front
Meta Description	Include keyword, benefit, and CTA
H1	One clear page-level H1
H2/H3	Use supporting keywords naturally
Body Copy	Match user intent and provide useful information
Product/Service Copy	Add benefits, features, use cases, and objections answered
Internal Links	Add 2–5 relevant internal links
Image Alt Text	Descriptive and natural, not spammy
FAQ	Add 3–5 useful questions when appropriate
CTA	Match page intent
URL Slug	Clean, readable, keyword-aligned where possible
Schema	Add or improve when applicable

Step 3: QA After Implementation

The assigned dev must confirm:

1. Page is live.
2. Page loads correctly.
3. Formatting is clean.
4. Links work.
5. Images load.
6. Metadata is updated.
7. Mobile layout is clean.
8. CTA works.
9. Tracking remains active.
10. Page is logged in the SEO Master Tracker.
11. Dashboard note is updated if client-facing.

14. Technical SEO SOP

Run or review technical SEO checks weekly using Ubersuggest Site Audit.

Weekly Technical Checks

Issue	Action
Broken links	Fix or redirect
Missing title tags	Add optimized title
Duplicate title tags	Rewrite uniquely
Missing meta descriptions	Add optimized meta description
Duplicate meta descriptions	Rewrite uniquely
Missing H1	Add one clear H1
Multiple H1s	Clean structure
404 errors	Redirect or restore
Redirect chains	Simplify
Slow pages	Compress, optimize, or escalate
Missing alt text	Add descriptive alt text
Thin pages	Expand, merge, or noindex if appropriate
Duplicate content	Consolidate or differentiate
Crawl errors	Escalate and resolve
Indexing problems	Investigate and fix

Technical Priority Order

1. Indexing and crawl issues.
2. Broken or inaccessible pages.
3. Metadata issues on money pages.
4. Duplicate content or cannibalization.
5. Slow pages.
6. Mobile usability issues.
7. Lower-priority warnings.

15. GA4 Analysis SOP

15.1 Weekly GA4 Review

For every site, review:

1. Organic Search traffic.
2. Organic users.
3. Organic sessions.
4. New users from Organic Search.
5. Engaged sessions.
6. Engagement rate.
7. Average engagement time.
8. Top organic landing pages.
9. Key events.
10. Conversions.
11. Revenue, if ecommerce.
12. Form submissions or inquiries, if lead-gen.

15.2 GA4 Red Flags

Flag a site if:

1. Organic traffic drops more than 20% week over week.
2. Organic traffic rises but engagement drops.
3. A ranking page gets traffic but no key events.
4. A money page gets little or no organic traffic.
5. Engagement rate is weak on organic landing pages.
6. Conversions are flat despite traffic growth.
7. Traffic spike appears unrelated to SEO.
8. Top landing pages do not align with business goals.

15.3 GA4 + SEO Decision Rules

Scenario	Action
Rankings up + traffic up + engagement strong	Protect page, add internal links, expand related keywords
Rankings up + traffic up + engagement weak	Improve intro, content match, CTA, trust signals, layout
Rankings up + traffic flat	Improve title/meta, check volume, review SERP features
Traffic up + rankings flat	Check other channels, long-tail queries, referrals
Rankings down + traffic down	Check technical issues, content freshness, competitors
Traffic strong + conversions weak	Improve offer, CTA, trust proof, funnel path
Traffic weak + keyword opportunity strong	Create or optimize dedicated page
Page gets impressions but poor action	Improve copy, speed, UX, CTA, and internal linking

16. Content Creation SOP

Create a content brief when:

1. A strong keyword has no matching page.
2. A current page does not satisfy search intent.
3. A competitor ranks with better content depth.
4. GA4 shows users need more education before converting.
5. A product/service needs supporting content.

Content Priority Order

1. Product pages.
2. Collection/category pages.
3. Service pages.
4. Landing pages.
5. Comparison pages.
6. FAQ/support pages.
7. Blog posts that support commercial pages.

No orphan blog posts. Every content piece must support a product, offer, funnel, authority cluster, or internal link path. Otherwise, congrats, we created decorative homework.

17. Internal Linking SOP

Each week, add internal links to priority pages.

Internal Linking Rules

1. Link from relevant pages to priority money pages.
2. Use natural anchor text.
3. Avoid spammy exact-match repetition.
4. Link blog posts to product/service pages.
5. Link related products or categories together.
6. Link educational content to conversion pages.
7. Track every internal link added.

Internal Link Log

Date	Website	Source URL	Target URL	Anchor Text	Keyword Supported	Assigned Dev
------	---------	------------	------------	-------------	-------------------	--------------

18. Client Dashboard SOP

Because Ubersuggest analytics are reflected in the client dashboard and GA4 is implemented across all sites, dashboard updates must include both SEO movement and traffic behavior.

Weekly Dashboard Update Checklist

For each client site:

- Confirm Ubersuggest data is reflected
- Confirm GA4 traffic data is reflected or summarized
- Confirm tracked keyword count
- Summarize keyword gains
- Summarize keyword drops
- Summarize organic traffic trend
- Summarize top organic landing page
- Summarize completed SEO work
- Add next SEO action
- Flag major issues
- Confirm client-facing language is clean

Client-Facing Weekly Note Template

19. RAAS Reporting SOP

RAAS sites do not require client-facing dashboard language unless internally requested, but they still require weekly SEO tracking.

RAAS Weekly Review Must Include

1. Ubersuggest keyword movement.
2. GA4 organic traffic.
3. Landing-page performance.
4. Lead/sign-up/demo/event tracking.
5. Content or landing-page improvements.
6. Keyword expansion.
7. Funnel improvement opportunities.
8. Next action.

20. Weekly Developer Responsibilities

Client Dev 1

Sites:

1. Snarky A\$\$ Apparel.
2. Blingy Bag LLC.
3. Snarky Pets.

Weekly responsibilities:

1. Implement product/category SEO updates.
2. Add or improve metadata.
3. Add image alt text.
4. Improve product descriptions.
5. Add internal links.
6. Fix assigned audit issues.
7. QA ecommerce pages.

Client Dev 2

Sites:

1. Serenity Scrolls.
2. Hwabelle.
3. PlayIQ.

Weekly responsibilities:

1. Implement content SEO updates.
2. Add FAQs.
3. Improve product storytelling.
4. Improve landing-page structure.
5. Add internal links.
6. Fix assigned audit issues.
7. QA content and visual layout.

Client Dev 3

Sites:

1. OxiSure Tech.
2. Montgomery Place LLC.
3. OxiSure Lifecycle Manager.

Weekly responsibilities:

1. Implement technical SEO fixes.
2. Improve compliance-safe page content.
3. Fix metadata and structure issues.
4. Review app/product page crawlability.
5. Add trust-building sections.
6. Fix assigned audit issues.
7. QA medical/wellness wording before publish.

RAAS Dev 1

Sites:

1. CheerCPT.
2. The Billionaire Brother.

Weekly responsibilities:

1. Implement landing-page SEO.
2. Improve product/service positioning.
3. Add schema where applicable.
4. Improve CTAs.
5. Add internal links.
6. Fix technical issues.
7. Support aggressive keyword testing.

RAAS Dev 2

Site:

1. Father Figure Formula.

Support:

1. CheerCPT.
2. The Billionaire Brother, when needed.

Weekly responsibilities:

1. Implement coaching/service SEO.
 2. Add blog and lead-gen content.
 3. Improve CTAs.
 4. Add internal links.
 5. Fix assigned audit issues.
 6. Support RAAS content velocity.
-

21. Definition of Done

An SEO task is not complete until:

1. Keyword or issue is researched.
 2. Target page is identified.
 3. Task is assigned to the correct dev.
 4. SEO update is implemented.
 5. Page is live.
 6. QA is completed.
 7. Ubersuggest is updated if keyword tracking changed.
 8. GA4 impact will be reviewed in the next cycle.
 9. SEO Master Tracker is updated.
 10. Client dashboard or RAAS tracker is updated.
 11. Next action is assigned.
-

22. Monthly SEO Review

At the end of each month, complete a deeper review.

Monthly Review Includes

1. Organic traffic trend.
2. Organic user growth.
3. Engagement trend.
4. Key event/conversion trend.
5. Keyword count growth.
6. Ranking wins.
7. Ranking losses.
8. Pages improved.
9. Technical issues fixed.
10. Content published.
11. Keyword clusters added.
12. Revenue or lead impact, where available.
13. Next month's priorities.

Monthly Strategy Questions

Ask:

1. Which pages are closest to page one?
2. Which keywords have buyer or lead intent?
3. Which pages get organic traffic but weak engagement?
4. Which pages get traffic but no conversions?
5. Which sites need technical cleanup?

6. Which competitors are gaining visibility?
 7. Which keyword clusters should be expanded?
 8. Which dev has bottlenecks?
 9. Which client dashboard needs clearer explanation?
 10. Which RAAS site has the best growth opportunity?
-

23. Priority Scoring System

Use this to decide what gets done first.

Priority	Meaning	Action
P0	Site-breaking, crawl, indexing, tracking, or conversion issue	Fix immediately
P1	Keyword ranking positions 4–20 with commercial intent	Optimize this week
P2	Money page under-optimized	Improve title, meta, copy, CTA, links
P3	Strong keyword with no matching page	Create content brief
P4	Technical warning or minor SEO improvement	Add to backlog
P5	Low-value vanity keyword	Ignore or revisit later

24. Quality Standards

SEO Copy Must Be

1. Clear.
2. Useful.
3. Human-readable.
4. Search-intent aligned.
5. Benefit-driven.
6. Naturally keyword-optimized.
7. Free of keyword stuffing.
8. Matched to the page's business goal.

SEO Copy Must Not Be

1. Robotic.
 2. Generic.
 3. Overstuffed with keywords.
 4. Misleading.
 5. Claim-heavy without support.
 6. Thin or useless.
 7. Written only for Google.
-

25. Performance Review Expectations

SEO success should be reviewed in 30, 60, and 90-day cycles.

30 Days

Expected outcomes:

1. Baseline established.
2. Keywords expanded.
3. Technical issues identified.

4. Initial page optimizations completed.
5. Dashboard rhythm established.

60 Days

Expected outcomes:

1. Early ranking movement.
2. More tracked keywords.
3. Improved metadata and page structure.
4. More internal linking.
5. Better GA4 visibility into SEO traffic.

90 Days

Expected outcomes:

1. Clearer organic traffic trend.
2. Improved keyword footprint.
3. Better-performing landing pages.
4. Stronger content map.
5. Better client reporting.
6. More confident SEO prioritization.
