

Metricool Demographic Capabilities & OxiSure Audit

Comprehensive platform-by-platform demographic coverage analysis, live API diagnostic results, and account requirements.

Client Name: OxiSure Tech	Metricool User ID: 4380439	Audit Date: August 2026
Client ID: 1a1edf9f-2ebe-4d40...	Metricool Blog ID: 5691500	Audited By: Sienvi Engineering

1. Executive Summary & Capabilities Overview

Metricool aggregates social audience demographics across connected networks via its Distribution API (/api/v2/analytics/distribution). The availability of demographic breakdowns (Gender, Age, Location, Professional Demographics) is governed by each platform's API rules, account configuration (Business vs. Creator vs. Personal), and strict follower volume thresholds.

Platform	Available Demographics	Account / API Requirements	OxiSure Status
LinkedIn	Countries, Industries, Seniority Levels, Job Functions, Staff Count Ranges	LinkedIn Company Page (Admin access)	Active (Live Data)
Facebook	Followers by Country, Followers by City, Locale Reach	Facebook Business Page (Age/Gender deprecated by Meta late 2024)	Active (Live Data)
TikTok	Gender (% Male, Female, Unknown), Top Countries	TikTok Business Account with 100+ followers	Pending (<100 Followers)
Instagram	Gender split, Age brackets, Top Countries & Cities	Instagram Professional / Creator Account	Pending (Threshold)
YouTube	Timeline metrics (Subscribers, Views, Engagement)	Demographics not supported via Metricool distribution API	Not Supported
X & Pinterest	Gender, Countries (where supported)	Requires connected network profiles in Metricool	Not Connected

Key Audit Finding:	OxiSure Tech currently has active, rich demographic tracking on LinkedIn and Facebook . TikTok and Instagram demographic queries successfully return HTTP 200 OK from Metricool, but require meeting the minimum follower and professional account thresholds before audience distribution arrays become populated.

2. Live Audit Results: OxiSure Tech

A live API query against Metricool distribution endpoints for OxiSure Tech (UserId: 4380439, BlogId: 5691500) returned the following confirmed data points:

A. LinkedIn Professional Demographic Breakdown

Top Countries	Share	Seniority Level	Share
United States	66.67%	Senior Level	33.33%
Canada	33.33%	Entry Level	33.33%
Others	0.00%	Owner / Founder	33.33%
Industry Sector	Share	Job Function & Company Size	Share
Technology, Media & Info	33.33%	Business Development	33.33%
Consumer Services	16.67%	Marketing	33.33%
Government Administration	16.67%	Operations	16.67%
Financial Services	16.67%	Information Technology	16.67%
Others	16.67%	Staff Count: 1 / 11-50 / 51-200 / 10k+	Balanced

B. Facebook Follower Geographic Distribution

Rank	Country	Audience Share	Key Insight
1	United States (US)	37.62%	Primary core market
2	Philippines (PH)	35.64%	Significant international follower segment
3	Mexico (MX)	4.95%	North American regional reach
4	Canada (CA)	3.96%	Secondary high-value tier
5	Pakistan (PK)	1.98%	International audience
6+	Global (UK, IN, AU, SG, etc.)	15.85%	Spread across 15+ countries (~0.99% each)

3. Recommendations to Unlock Remaining Platform Demographics

TikTok (100+ Followers)	OxiSure has 16 followers on TikTok. TikTok's developer API strictly requires 100+ followers and a Business Account to release gender and country metrics. Action: Once the 100-follower mark is reached, demographics sync automatically.
Instagram Professional	Metricool supports Instagram gender, age, and location. Verify the Instagram account is set to a Business or Creator profile linked to the Facebook Page to stream active demographic data.
YouTube Timeline Focus	YouTube demographic extraction is unsupported by Metricool's distribution API. However, all core performance KPIs (views, watch time, subscriber gain, comments) sync continuously in the dashboard.
